Acta Mechanica

2004

Contents

Alexandrov, S., Lee, W., Chung, K., Kang, T. J. Effect of constitutive laws on plane strain ideal flow design: an analytical example. ..... 173, 49 – 63

Alleborn, N., Raszillier, H. Linear response of a viscous liquid sheet to oscillatory external pressure perturbation in the long wave approximation. Varicose excitation. ..... 170, 77 – 119

Andranov, I. V., Awrejcewicz, J. Edge-localized effects in buckling and vibrations of a shell with free in circumferential direction ends. ..... 173, 41 – 47

Attia, H. A. A recursive method for the dynamic analysis of mechanical systems in spatial motion. ..... 167, 41 – 55

Bagai, S. Effect of variable viscosity on free convection over a non-isothermal axisymmetric body in a porous medium with internal heat generation. ..... 169, 187 – 194

Barakat, E. I. I. Variable viscosity effect on hydromagnetic flow and heat transfer about a fluid underlying the axisymmetric spreading surface. ..... 169, 195 – 202

Başar†, Y., Grytz, R. Incompressibility at large strains and finite-element implementation. ..... 168, 75 – 101

Bilgili, E. Functional grading of rubber tubes within the context of a molecularly inspired finite thermoelastic model. ..... 169, 79 – 85

Borejko, P. An exact representation of the image field in a perfect wedge. ..... 169, 23 – 36

Caviglia, G., Morro, A. First integrals and turning points for wave propagation in planarly-stratified media. ..... 169, 1 – 11

Chakraborty, A., Gopalakrishnan, S. A higher-order spectral element for wave propagation analysis in functionally graded materials. ..... 172, 17 – 43

Chakraborty, A., Gopalakrishnan, S. Wave propagation in inhomogeneous layered media: solution of forward and inverse problems. ..... 169, 153 – 185

Chang, R. C. The time-dependent interaction between inclusions and a cracked matrix subjected to antiplane shear. ..... 173, 163 – 179

Chao, C. K., Chen, F. M. Contact stresses in an infinite plate containing a smooth circular insert under thermal load. ..... 168, 195 – 212

Chen, C.-H. Heat and mass transfer in MHD flow by natural convection from a permeable, inclined surface with variable wall temperature and concentration. ..... 172, 219 – 235

Chen, J., Soh, A. K., Liu, J., Liu, Z. X. Transient anti-plane crack problem of a functionally graded piezoelectric strip bonded to elastic layers. ..... 169, 87 – 100

Chen, S. H., Tao, C. J., Wang, T. C. A study of size-dependent microindentation. ..... 167, 57 – 71

Chen, T. A homogeneous elliptical shaft may not warp under torsion. ..... 169, 221 – 224

Chen, Y. Z. Eigenfunction expansion variational method for the solution of a cusp crack problem in a finite plate ..... 168, 157 – 166

Chen, Y. Z. Multiple Zener-Stroh crack problem in an infinite plate. ..... 170, 11 – 23

Chen, Y. Z., Lin, X. Y., Wang, Z. X. Numerical solutions of a hypersingular integral equation for antiplane elastic curved crack problems of circular regions. .. 173, 1 – 11

Chhabra, R. P., Soares, A. A., Ferreira, J. M. Steady non–Newtonian flow past a circular cylinder: a numerical study. ..... 172, 1 – 16

Chiang, C.-R. Some crack problems in transversely isotropc solids. ..... 170, 1 – 9

Chiu, C. H., Wang, C. M., Chiou, M. C. Thermophoretic effects on submicron particle deposition in turbulent flow. ..... 170, 213 – 226

Chudinovich, I., Constanda, C., Gómez, E. A. Non-stationary boundary equations for plates with transverse shear deformation and elastic articulation of the boundary. ..... 167, 91 – 100

Colak, O. U. Modeling of large simple shear using a viscoplastic overstress model and classical plasticity model with different objective stress rates. ..... 167, 171 – 187

Cox, G. M., Hill, J. M., Thamwattana, N. A formal exact mathematical solution for a sloping rat-hole in a highly frictional granular solid. ..... 170, 127 – 147
Destrade, M., Saccomandi, G. Some results on finite amplitude elastic waves propagating in rotating media. ..... 173, 19 – 31
Djebli, A., Pascal, M. A new method for the orbital modification of a tether connected satellite system. ..... 167, 113 – 122
Dorfmann, A., Ogden, R. W. Nonlinear magnetoelastic deformations of elastomers. ..... 167, 13 – 28
Eraslan, A. N. Von Mises' yield criterion and nonlinearly hardening rotating shafts. ..... 168, 129 – 144
Erdogan, M. E., Imrak, C. E. Effects of the wall curvature on the flow in a duct of uniform cross-section. ..... 167, 123 – 130
Fabrikant, V. I. A new form of the Green' s function for a transversely isotropic body. ..... 167, 101 – 111
Fabrikant, V. I. Elliptic crack in a transversely isotropic body revisited: New symbolism. ..... 172, 181 – 193
Fang, T. Influences of fluid property variation on the boundary layers of a stretching surface. ..... 171, 105 – 118
Fischer, F. D., Simha, N. K. Influence of material flux on the jump relations at a singular interface in a multicomponent solid. ..... 171, 213 – 223
Gao, C.-F., Noda, N. Faber series method for two-dimensional problems of an arbitrarily shaped inclusion in piezoelectric materials. ..... 171, 1 – 13
Gao, C. F., Noda, N. Green' s functions of a half-infinite piezoelectric body: Exact solutions. ..... 172, 169 – 179
Gao, Y., Wang, M. Z. The refined theory of magnetoelastic rectangular beams. ..... 173, 147 – 161
Glocker, Ch. Concepts for modeling impacts without friction. ..... 168, 1 – 19
Haddow, J. B., Erbay, H. A. A note on finite amplitude transverse waves in a thermoelastic solid. ..... 168, 103 – 110
Hayat, T., Khan, M., Asghar, S. Homotopy analysis of MHD flows of an Oldroyd 8-constant fluid. ..... 168, 213 – 232
Itou, S. Stress intensity factors around a moving Griffith crack in a non-homogeneous layer between two dissimilar elastichalf-planes. ..... 167, 213 – 232
Jain, N., Shukla, A. Displacements, strains and stresses associated with propagating cracks in materials with continuously varying properties. ..... 171, 75 – 103
Kappler, M., Böhme, G., Müller, A. Numerical study on the nonlinear oscillations of a torsion absorber filled with a viscoelastic fluid. ..... 173, 65 – 76
Kapuria, S., Achary, G. G. S. Exact 3-D piezoelasticity solution for buckling of hybrid cross-ply plates using transfer matrices. ..... 170, 25 – 45
Karalis, T. K. On the optimization of shrinkage in soft cohesive soils. ..... 171, 119 – 131
Kattis, M. A., Papanikos, P., Providas, E. Thermal Green's functions in plane anisotropic bimaterials. ..... 173, 195 – 206
Kaveh, A., Rahimi Bondarabady, H. A. Bisection for parallel computing using Ritz and Fiedler vectors. ..... 167, 131 – 144
Khoroshun, L. P., Dorodnykh, T. I. The effective piezoelectric properties of polycrystals with the trigonal symmetry. ..... 169, 203 – 219
Khoroshun, L. P., Shikula, E. N. Deformation of composites with physically nonlinear matrix. ..... 168, 233 – 239
Kluwick, A. Internal flows of dense gases. ..... 169, 123 – 143
Krommer, M. On the influence of pyroelectricity upon thermally induced vibrations of piezothermoelastic plates. ..... 171, 59 – 73
Kuroda, M., Handa, Y., Ishikawa, M. Modelling of overall plastic deformation in rubber-toughened polymers. ..... 172, 95 – 112
Kwon, S. M. On the dynamic propagation of an anti-plane shear crack in a functionally graded piezoelectric strip. ..... 167, 73 – 89
Lazopoulos, K. A. On rigid-elastic bending and buckling deformations of long beams. ..... 169, 145 – 151
Lee, D.-S. The problem of internal cracks in an infinite strip having a circular hole. ..... 169, 101 – 110
Li, P. S., Wu, B. S. An interation approach to nonlinear oscillations of conservative single-degree-of-freedom systems. ..... 170, 69 – 75

Li, W.-L., Chu, H.-M. Modified Reynolds equation for coupled stress fluids – a porous media model. ..... 171, 189 – 202
Lin, D. T. W., Chen, C.-K. A molecular dynamics simulation of TIP4P and Lennard-Jones water in nanochannel. ..... 173, 181 – 194
Liu, Y. J., He, Z. Y., Fan, H. M. Scattering of SH-waves by an interface cavity. ..... 170, 47 – 56
Liu, Y. Z., Zu, J. W. Stability and bifurcation of helical equilibrium of a thin elastic rod. ..... 167, 29 – 39
Murthy, P. V. S. N., Mukherjee, S., Srinivasacharya, D., Krishna, P. V. S. S. S. R. Combined radiation and mixed convection from a vertical wall with suction/injection in a non-Darcy porous medium. ..... 168, 145 – 156
Nicholson, D. W. Non-iterative solution of finite-element equations in incompressible solids. ..... 167, 189 – 195
Nicholson, D. W. On stresses conjugate to Eulerian strains, Acta Mech. 165, 87–98, 2003 (Erratum). ..... 169, 225 – 226
Othman, M. I. A. Generalized electromagneto-thermoviscoelastic in case of 2-D thermal shock problem in a finite conducting medium with one relaxation time. ..... 169, 37 – 51
Othman, M. I. A., Zaki, S. A. Thermal relaxation effect on magnetohydrodynamic instability in a rotating micropolar fluid layer heated from below. ..... 170, 187 – 197
Pantokratoras, A. Laminar natural convection in water near the density extremum along a vertical plate with sinusoidal surface temperature variation. ..... 172, 211 – 218
Papargyri-Beskou, S., Beskos, D. E. Response of gradient-viscoelastic bar to static and dynamic axial load. ..... 170, 199 – 212
Pielorz, A. Nonlinear equations for a thin beam. ..... 167, 1 – 12
Pozrikidis, C. The pressure inside a suspended gas bubble. ..... 173, 119 – 130
Pozrikidis, C., Blyth, M. G. Effect of stretching on interfacial stability ..... 170, 149 – 162
Qian, Z., Jin, F., Wang, Z., Kishimoto, K. Love waves propagation in a piezoelectric layered structure with initial stresses. ..... 171, 41 – 57
